Project Development Phases	
Project Name	Visual Schedule Builder Plus (VSB_Plus)

Phase 1 - Demo

- Construct all the pages. (HTML, CSS, JS, PHP)
- Build a demo database where all the data are made-up.
- Based on that demo database, debug the system.

Phase 2 - Accessing

- Getting respond from the IT support about database accessing.
- Based on the method of databse accessing (API, partial database, etc.), fix and complete the PHP and JSON part.
- User loging, user page, advisor functionality.
- Complete all the feature of accessing actual database, fetching data.

Phase 3 - Writing

- Getting respind from the IT support about database writing authentication.
- Adding the course registing stuff.
